

> < > < > < > < > < > < > < > < > <

Greater than > and less than <

Look at the calculations below. Mentally solve each calculation and then decide whether to use the greater than (>) or less than (<) symbol to make the number sentence correct.

An example has been done for you below:

$$5 \times 9 < 8 \times 7$$

$2 \times 5 \square 3 \times 2$	$9 \times 5 \square 3 \times 11$
$3 \times 3 \square 3 \times 5$	$3 \times 0 \square 12 \times 5$
$6 \times 5 \square 3 \times 4$	$3 \times 1 \square 0 \times 5$
$8 \times 5 \square 3 \times 8$	$11 \times 5 \square 3 \times 12$
$3 \times 7 \square 4 \times 5$	$2 \times 5 \square 3 \times 6$
$7 \times 5 \square 3 \times 5$	$4 \times 5 \square 3 \times 9$
$10 \times 5 \square 3 \times 10$	$3 \times 4 \square 8 \times 5$
$3 \times 6 \square 1 \times 5$	$9 \times 5 \square 3 \times 12$

> < > < > < > < > < > < > < > < > <

Greater than > and less than <

Look at the calculations below. Mentally solve each calculation and then decide whether to use the greater than (>) or less than (<) symbol to make the number sentence correct.

An example has been done for you below:

$$5 \times 9 < 8 \times 7$$

$2 \times 5 \square 3 \times 2$	$9 \times 5 \square 3 \times 11$
$3 \times 3 \square 3 \times 5$	$3 \times 0 \square 12 \times 5$
$6 \times 5 \square 3 \times 4$	$3 \times 1 \square 0 \times 5$
$8 \times 5 \square 3 \times 8$	$11 \times 5 \square 3 \times 12$
$3 \times 7 \square 4 \times 5$	$2 \times 5 \square 3 \times 6$
$7 \times 5 \square 3 \times 5$	$4 \times 5 \square 3 \times 9$
$10 \times 5 \square 3 \times 10$	$3 \times 4 \square 8 \times 5$
$3 \times 6 \square 1 \times 5$	$9 \times 5 \square 3 \times 12$

> < > < > < > < > < > < > < > < > <

Greater than > and less than <

Look at the calculations below. Mentally solve each calculation and then decide whether to use the greater than (>) or less than (<) symbol to make the number sentence correct.

An example has been done for you below:

$$5 \times 9 < 8 \times 7$$

$7 \times 5 \square 9 \times 2$	$9 \times 5 \square 3 \times 11$
$2 \times 6 \square 8 \times 5$	$3 \times 9 \square 12 \times 2$
$6 \times 7 \square 12 \times 4$	$9 \times 6 \square 7 \times 8$
$8 \times 5 \square 6 \times 8$	$11 \times 6 \square 7 \times 8$
$6 \times 7 \square 4 \times 9$	$2 \times 8 \square 3 \times 7$
$7 \times 9 \square 3 \times 12$	$4 \times 12 \square 3 \times 9$
$10 \times 8 \square 9 \times 9$	$7 \times 7 \square 8 \times 5$
$3 \times 6 \square 2 \times 7$	$0 \times 5 \square 0 \times 6$

> < > < > < > < > < > < > < > < > <

Greater than > and less than <

Look at the calculations below. Mentally solve each calculation and then decide whether to use the greater than (>) or less than (<) symbol to make the number sentence correct.

An example has been done for you below:

$$5 \times 9 < 8 \times 7$$

$7 \times 5 \square 9 \times 2$	$9 \times 5 \square 3 \times 11$
$2 \times 6 \square 8 \times 5$	$3 \times 9 \square 12 \times 2$
$6 \times 7 \square 12 \times 4$	$9 \times 6 \square 7 \times 8$
$8 \times 5 \square 6 \times 8$	$11 \times 6 \square 7 \times 8$
$6 \times 7 \square 4 \times 9$	$2 \times 8 \square 3 \times 7$
$7 \times 9 \square 3 \times 12$	$4 \times 12 \square 3 \times 9$
$10 \times 8 \square 9 \times 9$	$7 \times 7 \square 8 \times 5$
$3 \times 6 \square 2 \times 7$	$0 \times 5 \square 0 \times 6$
